

Tag-Tails FAQ

Tag-Tails FAQ (Q1-Q31)

Getting Started

1. What is Tag-Tails?

Tag-Tails is a smart pet tag system that helps reunite lost pets with their owners using QR codes.

2. How does it work?

When someone scans your pet's tag, they see the contact details you choose to share.

3. Do I need to download an app?

No. Everything works through your browser.

4. How do I set up my pet's tag?

Create an account, add your pet's details, and link the tag by scanning it.

Using the Tag

5. What happens when someone scans the tag?

Your pet's profile opens with the contact details you've chosen to show.

6. Can I update my pet's details later?

Yes. You can edit your pet's profile at any time.

7. Is the tag waterproof?

Yes. The tag is waterproof and suitable for everyday outdoor use.

8. Does the tag work outside the UK?

Absolutely. The QR code works anywhere in the world - anyone who scans it can see the details you've shared.

Privacy & Safety

9. Are my contact details public?

No. You choose exactly what information is shown when someone scans the tag.

10. Does this replace a microchip?

No. The tag is an extra safety layer - you should still keep your pet microchipped.

Accounts & Pets

11. Can I add more than one pet?

Absolutely. You can add multiple pets - each one gets its own profile and tag.

12. Does the person who finds my pet need an account?

No. Anyone can scan the tag and see the details you choose to show.

Lost Tags & Replacements

13. What if my pet's tag gets lost?

Don't worry - you can order a replacement tag. Your pet's profile stays exactly the same; you just link the new one.

Subscriptions & Costs

14. Do I need a subscription to use the tag?

No. The basic service is free. A subscription only adds optional extra features.

Emergency Info

31. Can I add medical or emergency information to my pet's profile?

Yes. You can add vet details, medication, allergies, behaviour notes, or anything else that helps someone care for your pet if needed.
